

Day-jà Vu
 Adam Maresca
 Answer: **JULIUS CAESAR**

The modified bingo cards' contents, unique in all 300 cells, all contain various plants, creatures, minerals, agricultural products and tools vital to pre-industrial society. The "players" listed atop each all have some seasonal connotations, such as weather or temperature or plant life. Combined with Calendar Man and the titular French pun, the French Revolutionary Calendar is the key to this one, in particular its Rural Calendar, in which every item on the cards is the object of celebration on a specific day in some month.

Every "player" corresponds to a month in that calendar; select the things celebrated in that month on their card, and disregard the others. Highlight/mark these on the cards.

The resulting message "NOW DO 10 L BY 3 H" indicates that now the specifically used days from those months are going to come into play, as a ten by three grid of each month would show the ten-day weeks (*décadi*) which subdivided the months.

Highlight the days that appear on the correct bingo card for each month and place in order.

The filled-in cells now read a man tied heavily to the calendar, **JULIUS CAESAR**.

Author's Notes

Adam: My apologies to P&A Magazine's Foggy Brume for not being the clued figure for the second month; I gave Puzzle Boat a nod in another puzzle and didn't want to repeat myself. Besides, it would set a bad example to double-clue Brumaire and only single-clue the other months. I'm sure he'll understand.
